section from he excitatively entitled to use for recephication of all a excitate excitation to it, or to The Americane From or Recture, in this to a local size the local news published therein.

Progress

Those who remember the days when the people of Belleville had no such help in snow clearance as that which is given doubly be proposed in some clearance as that which is given doubly be proposed in the days had to showel their way clear. To older people in those days that take must have come with a great deli of concern for in long-gone years as the winters today snow was often deep. In those days there were no widely cleaved roads and the horse and sleigh runners had to break their way. Today roads soon become levelled with a precision which makes road to the read of the state of the state of the read of the rea

Medical Advance

Science marches on with its conquest over disease and its production of new agents to help man in his fight to retain his health and improve the health of the nation.

Which blood transfusion was a novelty little could man have forceson the benefits which would result from this new discovery. One, of the advances is seen in the ald transfusions or give by making less dancerous a number of

name discovery. One set we advance is seen in the skill transfusions give by making jess dangerous a number of types of operation or making possible operations which would under other conditions not be possible.

Dr. W. Stuart Stanbury, National Director of the Transfusion Service, recently pointed out that with the arpandon of the Canadian Red Cross Shood Transfusion reactly increased. He points out that as many as ten to sweatly bottles a day are sometimes required for a patient undergoing a major operation.

This service is now organized in five provinces of Ordario will follow at the turn of the year.

Blood which is the itself and is nature; means of feedmaning. One has to think only of the time when transfusion was not known to realize what a benefit it has since proven to manking.

Soviet and the Composer

Soviet and the Composer
Russia in the past has produced music which has become popular and has been given a high place in the act
production of the words, but Soviet a William 1, and the sound of the words but Soviet a William 1, and the sound to the words of the sound to the

Any nation's best hope in the art's is to leave shem un-tramelled and free to express the spirit, not to try to pour composer after composer and their art into rigid molds, which prevent them becoming a living thing and express-ing the spirit of the people.

How Russian composers can be held in thrall by such all yand that eart. To brest to the natural local or che-sity and that eart. To brest to the natural local or che-sis and the second of the second of the second of the local controlled and be a living thing, influencing a nation of the second of the second of the second of the second of the tild is restrained and bound. If it is restrained and bound.

News of the heavy fall of snow in the Gatineau area is not unpleasant news to users of electric power in Southern Ontario. What with the rains and the late advent of winter and now with heavy precipitation of snow, nature seems to be at work building up supplies of water for the future months.

There have been several dry seasons and it may be that nature has come to the turn of the road and will be more generous with precipitation of rain and snow than in the past couple of years

Two-Year Term For Council In Toronto Beaten

Toronto, Jan. 3 (CF)—A con-tentious proposal for a two-year city council ferm was snowed un-der - Seturday as Toronto voters re-elected Mayor Hiram McCal-lum as Mayor for 1949. Electors voled 73,638 to 46,791 to defeat the two-year ter-posal which had provided to gest, issue in the civic to

campain.

Mayor McCalium polled 97,713
votes to defeat his only opponent,
Ross Rowson, a member of the
Trotakytie Revolutionary Workers Party, who had polled alightly
more than 15,000 votes in an unsuccessful mayoralty bid last

re-elected two Communist alder-men who have represented the two west-central wards since 1944. Two other Communist can-

elected to the Board or acutes— one of them by acclamation. Only some 121,000 voters—less than 35 per cent of the approxi-mately 390,000 eligible electors— turned out to cast their ballots in blustery weather. Some 39 per

histery weather. Some 39 per ent voted last year.
John Innes, a contractor with 10 years on city council, led the polls for the Board of Chntrol and, through precedent, will become vice-chairman of the Board of Control. Toronto controllers re-Two New Controllers

Whig-Standard 100 Years a Daily

January I, 1849, was a day of note in Kingston, for on day the British Whig, one of the ancestors of the spinor Whig-Standard, distributed its fart copies as y. To mark the centenary of so important an event as appearance of a daily which still appears in the King-Whig-Standard, a special centennial edition will be

In whige-standard, a pocial centennial edition will be and on January by the founded 115 years ago by Dr. The intitlah Whig was founded 115 years ago by Dr. rend Bather as a semi-weekly. Prom January 1, 1696 to year 1626, that newspaper was published as a daily in the lattice year become numlegamated with the Dally indicat as the Whig-Standard and has since been issued set that name.

onderd as the Willy-Standard pair has some over source for the time. The that items of the that cannot be the Canada is a long time for in this 5 monitord years this country has had a remarkable dependent, Back in 1849 life was vastly different from at it is today. Since then Canada has become a Confliction and world conditions and confliction and world conditions and world conditions are pressly changed. Throughout this long period of time part of the confliction of the confliction of the best principal of least to be to present the community are due to the best principal and a least the community are seried and of the growing Canada of

hose times.

The newspaper has been in intimate touch with the listrict and its problems and with the history of progress in the whole of Contario and the Dominion. It has had no excellent opportunity to serve the people and their besteas and has left an infunence on its public. It has shown is fairness of view and its considerations stand on issues as the paysons. As a representative daily it is held in respect and honce everywhere among newspapermen, its readers not the minite.

and honce everywhere among newspapermen, its readers and be public.

A look back for a century is sufficient to show how ininstaly the Will-Standard has touched the life of Bastmarky the Will-Standard has touched the life of Bastmarky the Will-Standard has touched the life of Bastmarky and the standard and the processors are those wital
principles which will be guides during the second century
of this daily newspaper. This is an impressive fact which
must be felt by Senator W. Rupert Davies, the publisher
of the Will-Standard, and inspire him with the brightest
hopes of the influence of this newspaper in the long years
sheed in a country which has now reached its dature of
nationhood and is continuing to grow. It was not also
marked the summer of the service of the influence of the newspaper in the long years
of the Bountry which has now reached its dature of
nationhood and is continuing to grow.

The work of the standard was been associated.

On its mission in the years of the future, it carries the
good will of its readers everywhere and of the newspapers
of the Dominion as an institution worthy of democracy in
the tweltich contary.

twentieth century.

Worthy Memorial

Overseas students in Britain are to have a beautiful country home house in Scotland where they will be able to spend a fortnight or more there for study or relazation or reading among the seenery and surroundings of this historic land.

Students will entitle the contract of the seenery and surroundings of the second students will entitle the second students will entitle the second sec

or reading among the scenery and surroundings of this listoric land.

Institute that will enter lead reads in such a place with list impiration of that yeastle of culture that entits in that land of freedom. The donor of the generous gift is an anonymous Scotzman who wants it to serve as a memorial of the part which the people of Estian played in the recent war. Such service as the people of wattime Estianing are in the recent war. Such service as the people of wattime Estianing are in substantial gift, which is certain to bring influences regord into the lives of the students who are privileged to go to the Old Country and study in this most fertile atmosphere of true culture, also wants the home to serve as a happy, meeting place where students from Estianin and corresses may come to know semething of each other's corresses may come to know semething of each other's factor has also contributed a large enough sum so that the charges to students may be kept moderate.

— In a year's time this house will be ready. Any student from any part of the Estish Commonwealth may take ad-

In a year's time this house will be ready. Any student from any part of the British Commonwealth may take ad-vantage of the scheme. It will accommodate 25 students to begin with and it is situated between Aberdeen and Dundee, about 100 miles from Edinburgh.

Ruhr Internationalization

Rubr Internationalization
One of the achievements following the war was made public the other day in the announcement of the plan to internationalize the production of the Rubri industries for the cause of peace. This was the area in Germany whose production was used to strengthen the Nasi this for world power. Now the Rubr will be used to serve the purpose of international harmony, not international discord.

The Rubr was pounded to pieces of rubble and to dust by Brittia and American air power in the greatest series of bombardments and statesh in all battory.

But the state of the statesh in all battory.

The Rubr is Buropean as well as German economy with the sateguard of international control is an important step. The Rubr is profile in materials and therefore was made the servant of Ritleriam in the assault upon the world. Now it can become the agency of peace and Buro-

rld. Now it can become the agency of peace and Euro

Tito and Communism

Tito and Communism Which is shown in Vugoslavia by Marshal Tito is a new phenomenor in its opposition to Sortel efforts to convert the people to a Russian colony through economic pressure. The significance of this is Sortel efforts to convert the people to a Russian colony through economic pressure. The significance of this is conflict has been turned against the Russian Government, itself. Note is made of Tito's comment that the Yugoslava rea Incapable of crawing on their billies "like reptiles" before any power. However Yugoslavia still remains committed to both Communist program and doctrine and Soviet foreign policy in the allegiance to Communist words rungle against the "capital-sid" demorracine oct to the artuggle against the "capital-sid" demorracine, oct to the artuggle against the "capital-sid" demorracine, oct to the artuggle against the "capital-sid" demorracine, oct to the artuggle against the "capital-sid" demorracine.

isi" democracies.

The attitude of Yugoslavia is seen as new only as the discord is manifesting itself outside of Russia, says the Times. Yet it is looked upon as something portentous as abowing that "Communism cannot eradicate the national showing that "Communism cannot eradicate the national sensibilities of ancient peoples," something which is raising the specters of other Titos in the Kremin. It may be contribute to that spilt among the Kremin masters at which Mr. Truman and Mr. Churchill have been hinting. It also shows, the Times believes, that Europe is not a fertile spot for coionishim and that any stempt to introduce it into Europe may lead to revolt at the first chance. Hence it into Europe may lead to revolt at the first chance seems to break on the Soriet box on and weaken the threat to the rest of the Eowiet box and weaken the threat to the rest of the world, it can be welcomed, but as long as a country is committed to Communism there will have to be safeguards and restrictions concerning potential war supplies, says the New York newspaper.

The King of Speed

The King of Speed

IST Malcolm Campbell, Brittin speed Ming, who
achieved his great ambition of being the first man to
array on land at a speed above 300 miles an hour, has
nessed but his spirit lives in the lives of thousands and
the speed of the day for he conspeed of an amobiles and boats. As a youth, speed, which
is the ambition of youths today, was his choice and in his
ince he became a name known over the world.

His development followed a natural trend. He caught
which he became a marked town and molorcycle with
which he became a marked town of the propers is celemits he
permanded himself that his place was on the ground. Yet
is true to say that he was one of the placenes in avisition.

permanded himself that his place was on the ground. Yet, its true to say that he was one of the planeer in aviation. He ambition was doubly-pointed, he desired to excel bersonally by driving and he did so by working on the designs of automobiles, applying improvements as a result of the experience. Most people result the days when for a quarter, of a century his name was most famous in the speed world. He ninally achieved his goal article-mile-an-hour mark. That Is 1035 when he exceeded the the speed world.

career.

Sir Malcolm dominated the speed world of his time, no other approaching him and he raced against his own records for long as there were no rivals in his field. Since he gave up racing continued improvement of care has helped to bring the speed up to about the 460-miles-n-hour mark.

Of Campbell it is realized that his achievements went are to improve the mechanics of the automobile and what itself the progress and development of the motoccuts to the 18 to 18 to

In his day he set records for daring driving under con

In his day he set records for daring driving under con-ditions not nearly so favorable as they later became and the progress of the car owes no little amount to his daring, his ingenuity and his mechanical genius. The age in which he lived was an age which excelled alf ages of history in mechanical progress and in the ap-plication of improvements and new principles to the fulfi-ing of cars for condict and for speed.

Cost of Living Index

There is a gleam of comfort for consumers who have long been watening the rise of the cost of living prices index to learn if there is a trend against the aimost could unlike. The announcement on Wednesday offered the ual rise. The announcement on Wednessay oriered the hope that there may be as this is the first time in nearly two years in which there has been a drop in the prices index. The decline at this time is seven-tenths of a policy. The drop was from 150.8 as of November 1, 1948 to 158.9 at

A FRIEND UNIQUE

friendi So dif-

So strangs a friend! So different from
All others — Herry, Dick or
Or Ella, Lydia, Bess or
Jane—
With me outstanding
you'll remain.
I'd say — and it is truth I
speak
In one respect you are
unique.

The other day we stopped to chat. chat, ezzed. No notice paid to that! Were red, were red, not a word of that you chest, You merely told a merry test. Plainly a cold! And I was

Sum and I was
sure
You'd soon prescribe your
favorile cure
And ere we paried you would
Just what would promptly
have me well.
All other friends, both young
and old,
Know just the pill to cure
a cold.

Not you. You heard me hack and cough, And silently went walking

"Oh, there you are, dear."

WE APOLOGIZE

The construction of any large industrial plant poses many problems. Not sethe least of these is the inconvenience
caused the public when streets are
blocked or torn up as the result of
building operations.

That's why we extend sincere apologies to the people of Belleville for the trouble caused them in building our new lens manufacturing plant on Wellington and Bridge Streets. We deeply appreciate their courtesy and patience during the construction period.

However, we are now glad to report that the plant is rapidly nearing completion and the public's inconvenience is practically at an end.

WE PLAN AHEAD

Messy, too, we know, is the term for the appearance of the grounds outside on mew plant. But, again, this was necessary to the work of construction... and is a condition that will be corrected by our contractor. He will level the grounds and return them to as good, or even better, condition than they were when construction was first started. And as soon as conditions permit, it is our plan to plant grass and shrubs.

In preparing neat and attractive surroundings for our new plant -a

site that will be a credit to the community — we believe we are meeting our goal of being good neighbors and citizens in Belleville.

When our outside work is comviewing our new plant will be favorable. They will carry away the impresion . . . one we know to be a reality
. . that here is a plant in which products of quality are produced by people
who take pride in their work and surroundings.

THOMPSON AMBULANCE SERVICE

The same experienced men that we have had for years operate our ambulance. Patient and passengers fully insured.

We have had many favorable comments on our personal service. Our staff of careful drivers is experienced and courteous. We find it is better to get the patient to the destination safely than to take chances.

Sees "End of Big Wars"

"We have come to the end of the big wars—there can be no doubt of that," commented the other day Commis-sioner David Lamb of the Salvation Army, a retired officer,

stoner Davin Limo or the caracteristic move on a tour of Canada.

The world will brust that his view will prove correct.

Man knows how much greater was the havoe of the Second
World War than of the first. No extactysm which has hit
earth has had so uprooting and devastating an effect as the

earth has had so uprooting and devastating an effect as the latter war.

Inktory, however, there have been series of wars and these passed, so the democratic nations may hope that no third conflict of such a kind may ever cons.

Commissioner Lamb sees in the formation of the United Nations the foundations of a permanent passe. The Expert-old commissioner, all will hope the Expert of the commissioner, all will hope the proof of the world outlook and under the such devoted this life to the good work of high sub-solve the problems of humanity will prove to be agree when he so peaks of the future relations of the authors of the world.

Polite Veterans

Politic Veterans
When a young man addresser you as "dir," It's quite in order to aas him which of the services be was in, and the length of time he pent overseas. Bit easy outrety marks him to be pent overseas. Bit easy outrety marks him to the pent overseas. Bit easy outrety marks him to the harmy, favry, or if Force.

This revival of the use of "dir' came at a time when it was all but cutted. Young people apparently had come to regard it as something degrading. Then the war came and maltary discipline begin to remoth the cuttoms of hundrids of thousands. "dir' became a required form of address for servicemen.

ried of thousands. "Bit" became a required form of adthese for aerichian when the restrict and the significant, however, that although more than
the significant, however, that although more than
three years have passed since demobilization, these veterans are maintaining this usage. They see no self-abasemain in it, and in fact do bource lines. The similar than the selfmaintaining this is the selfactive and the selfcompletely than any service button can do.
The armed forces, too, may look back with yirde on
this effect of their discipline. Although theirs was the
grift task of hardening young men for war, they turned
print task of hardening young men for war, they turned

"Wear-Ever"

Pressure Cooker "WEAR-EVER" Pressure Cooks

"PAL-O-PAK" Loose Fill Insulation Light, Safe, Economical

New type insulation! A big seller in the United States now manufactured in Canada, and available at C.D.S.

Save on fuel bills, and keep your home at a comportable temperature! 'PAL-O-PAK is a caliniose product — flutly and fibrous ... which, according to scientific analysis, has high insulation value.' Thus it is a suitfactory choice when selecting an insulation for your home.

There are more good reasons for insulating with "PAL-O-PAK". High coverage (bag covers about 20 aq ft., about 4" thick)

-Easy to install (non-irritant) -Light in weight (bag weighs about 15 lbs.)

-Treated to resist moths, vermin, re-

-Save on insulation

Maintain Productivity of Our Forests

Manntam Productivity of the Canadian forests, provided they are properly utilized, can be maintained for all time, say a study by the Canadian Pulp and Paper Association. But—"the critical point in the utilization of the Canadian forests is approaching. Sooner or later the annual consumption will equal the re-growth. Except for the canadian forests is approaching. Sooner or later the annual consumption will equal the re-growth. Except for the canadian forests in a special consistency of the canadian forest than the canadian forest than the canadian forest than the canadian forest depiction.

"The Canadian public has every reason to worry about its forests because their future is definitely endangered by the spruce budworm plague, which has reached epidemic proportions. Some 22,000 square miles of forests have been utterly devastated and destroyed. It now is present in roughly one-third of the accessible productive forests of

"With fire, no less than 60 per cent of the original for-ast has been burned—only 13 per cent has been cut for

"A basic need in the Canadian forest situation is a implication of the facts so that, when and where required, assumption can definitely be limited to annual re-

The pulp and paper association review is a 16-page book called "The Pulpwood Harvest," which marshals its information in easily-understood form and presents it in imaginative writing. It is a dramatic story of the forest, what it is and what it means to Canada, and how it is

The forests fall into two categories, the unp mostly along the northern edge of vegetation, covering 477,850 square miles; and the productive, covering 813,110

The productive forests fall into another two groups

The productive forests fall into another two groups; the accessible, covering 485,000 aquare miles, and the inaccessible, 376,110 aquare miles.

The review is enriched with passages like this:

"In the hurly-burly of Canadian like, amidst the roar industry, in the activity of the ports, and surrounded by majestic engineering exploits, few Canadians recall that bears hamst the forests within sight of the cities, and that the woodman's are, often a stone's throw from civilization, rings a time that reverberske throughout the land. In short, the forests, as ever, remain a great bastion of Canadian commerce.

Navigation

World navigation has played a notable part in the progress of the world and the growth of civilization. The Duke of Edinburgh, speaking recently at an exhi-

bitton in Londour on the progress of navigation through the centuries, said that it was appropriate that the exhibition should be held in Britain which has contributed party all the notable advances in navigational science. He said that the first completely natural aimance committed in England as did the first sextant and the first marine chromometer.

Among the exhibits in view are the earliest known optical instruments in the world and many historically in

Side by side with these are the modern radar, echo soundern radio direction finders and the electric eye which can pierce the heavies fog.

Trade vs. The 'Curtain'

what's going on in gale of the Iron Curtain causes the Christian Science Monitor to remark that some people must be aking how Moscow has permitted Poland to make a new trade agreement with Britain. Under the treaty the Britain breakfast will be bolstered with bacon and eggs from Poland and Polish timber will figure in it while there will flow Britain book, rubber and machineve while there will flow British wool, rubber and machiner into Poland. It is a \$600,000,000 deal.

It is a reflection on conditions behind the Iron Cur tain, says the paper for "East is East and West is West but ever the two must trade." It adds that "the agreemen does not advertise Russia's 'nability seven to make good where the Marshall Plan might have made better."

The cheapest of all things is kindness, its exercise requiring the least possible trouble and sacrifice.—Smiles.

24 - HOUR SERVICE GREAT-WEST LIFE

The co-operation of labour and industry in re-arranging working schedules to relieve the power shortage is very much appreciated by The Hydro-Electric Power Commission of Ontario and the Municipal Systems. It is vital that the weekly working schedules spread over six days and six nights be continued, if the present level of production is to be maintained.

While present water levels and the high degree of cooperation on the part of all classes of Hydro consumers have enabled the Commission to maintain increased power quotas to municipalities, we are now entering a critical period of the Winter when extreme care in the use of electricity must be exercised by all consumers.

It should be remembered that, despite increased quotas, the power shortage is still with us, present resources being some 4,000,000 Kilowatt-hours per working day short of meeting the demand. Unfavourable weather conditions and excessive use of electricity can easily aggravate this condition to a point where a return to power interruptions may be necessary.

Cut down on electricity. Keep pay envelopes full.

Science in Our Lives

Science in Our Lives

Between has moved rapidly, in this age and yet admoments has not been always fast, but rather by file and
fasts. Boyal Bank of Canada, but rather by file and
fasts. Boyal Bank of Canada better for January, on
Science in Our Lives' fails that it was about the yets 200
(that Archimote discherers the fore Leonardo da Vinci
well to work on it in the fifteenth emitury and "only the
east to work on it in the fifteenth emitury and "only the
feet day, 'Great Firstlant, Canada and the United Sisten
to together for the first time to standardize threads to a
make server interlant, south of the one impressed
by the apparent diversity of selfone as by its real unity."
The mischlevous momely pulls things spart; the same unity
in mass and the strength of selfone as by good with the
price. Much of his struggle seems to the outdator to
be quite pointless, but he has his eye or some goal which norms
may be made as a result of persistence than because of
mental belliance."

mental brillance."

Another phase of science is touched on "Science is the foundation of our wealth but the rise of new businesses on that foundation creates new problems. On that hast stere is at increasing need for an understanding of industry but ecommunity and on the other hand the need on industry's part to develop its understanding of the community.

the community and on the other hand the need on Industry's part to develop its understanding of the community and of employees."

"Today the whole economy has been affected by science," it is stated. New materials and processes can be titled, there is increased geographical modelity of labor and expitat, there is the increased are of change, leading to quicker depreciation and doubtenest of goods, there is also to the community of the community. The has brought invaries and necessities within the reach of more people, changing the aspect and outlook of whole committee."

Recently, the letter says, Canada has tisen from aciented the community, the letter says, Canada has tisen from aciented the community of the community.

countries."

Recently, the letter says, Canada has risen from scientific goods to maturity and in the words of the President of the Ristinosa Research Council, Dr. C. J. Machemis, "is now in the front line of the aleintific world for the first in any simable way."

Science has placed man on an eminence from which we cails sever far though we do not know what lies below the choice. But the most challenging my what lies below the choice. But do what science can do to make life happier, easier and more satisfying."

Fallacies Over Food

Do you believe that white eggs are preferable to brown or vice versa? The U. S. Department of Agriculture says that eggs are eggs and that there is no difference in laste or putritive value. That is one of the lingering supersitions about 100d. Others are the relative ments of case and best sugar for making felly. Experts any there is no chemical differences.

It is not been supersized to the control of the

If any of kering foots in a can. It is admitted that such add foots at roll and tomices may acquire a slightly metallic tasts but they are not damaged. Alumhum wastely be used for containing foot, says the department. On other food failagies the Port Arthur News Chronice says that many are absociated with the combination of certain dishes at the same meal. There is no need to heat as bout drinking mill? with fah, sour cherries, tomatoes or other food. And if some of the combinations of oursile in the stonach so much the better for the digestion. No two hoods are such as the condition of the combinations of two the conditions are the stonach so much the better for the digestion. No two hoods are such as the condition of the combinations of two districts. Also exploded is the view that used to be held that appendictifs could be caused by eating fruit seeps.

"These food notions take a long time to pass out of circulation." Only time and actence will finally banish them.

Use to which modern inventions are being put now would have seemed impossible not long ago. It is only a little while since during the recent war that the walld-talkie came in as an instrument of importance. Now one has been added to the equipment of the Montreal free department because of its value in directing operations from a distance or to a man on the top of a tall indeed;

This Weather

This Weather
The days of this winer have often been days of
sum and fine weather. Several times there have been reports from all parts of the Continent of North America
reating of the unusually mild spell of temperature which
non-marked the late autumn and the winter so are. Telestday's weather was marked unusually warm'as the promotication from the reports they have at hand were pridicting much coller weather for fourcities much coller weather for fourtime of the collection of the sevential
and the sevential collection of the sevential
and the sevential collection of the sevential
and collection of the sevential collection of the
until winter season, winter may linger on in the lap of
notices.

usual winter season, winter may linger on in the lap of p-pring.

Wither, frost and loe, biasts atter blasts of circum with move and wind always got operher. In writingly essents out the control of the

to be.

However the last two winters have been late in starting but the present season is later than either. Is the mild seather going to wrack its recent as the conficial end of winfer and in the early days of spring? The last two springs have been somewhat tardy. Will the coming spring less likewise hat?

The West of Canada has felt the cold and the East has been feeling the geislat warmth of a season much later than this. Somehow the climate seem mixed.

Youth Has Opportunity

Youth Has Opportunity
Youth has a chance in this modern age. An eighteenyear-old Yorkshire bor, Raymond Button, is now savingtime and labor in the manufacture of alarm clocks in a.
North Ragiand factory. The plant recently developed a
machine for winding alarm clock springs to replace manlaw indings. The youth had produced a drawful flustrating this idea for an even better manufacture of a second second in the second in the

An Outstanding Leader

An Outstanding Leader
General George Marshall has earned the enduring
praise of his country by years of devoted service as well as
of the world. In the surny as a career-he became Chief of
the U. S. Starf in 1939. During the war he was called upon
to render invaluable service in building up to the Allied
victory: He was long associated with the warding President Franklin D. Roosevel in duties of the limit of the concent of the control of the control of the control
control of the control of the control of the control
cont

General Maranian has with the factor of the factor of the problems which have followed the war. At present here is at work what is known as the Marahall Plan for the recovery of Europe, on which great hopes are placed.

Progress by Motorization

Progress by Motorization.
The last edition of Facts and Hymen of the Automotive Industry talls a story of sleedily assuming numbers of solutions and trucks with a story of sleedily assuming numbers of solution in 1017 and the story of sleedily assuming to the story of the story

ners 663. In Prince Edward County there were 3,457 cars and

Bil brucks
Thicks modorists very largely holiside everybody in Thicks as as corner or as a member of a family planeing one on more more whiles.

Bith facis throw a light on modern living and show the sweeping progress which has been made in the motor-hastion of the whole-father of society. Today the cas and the burs and transport enter into closest resistentially with our daily lives. There was a time among position though how as a time among position though how and one of the presentage of the state of the

After Years of Time

After Years of Time
The progress of the New World in a position of greatest
importance is referable to the development of revery part
of it. Monthly in the properties of the transportance of the tra

is the east by sating wearance. It is years the what of real estale in Manhattan has risen 160,000,000 times.

150,000 times. In the last work of New York City, which is the last with the last in the whole of the last way of the last with the last in the whole of the last way of the la

A network in the Cleveland Fishn Dealer is made to a their of 160 witten in the homeland of the Dubth color-ists in the New World, telling of a cargo which had just actived from New Heberhands which included "77,546 beaver sides, 178% otter akins, 46 minch aktna" and an-mouning the purchase of Manhattan for do quides. That surely points to progress while ever yet as are the hunting amenda into discovery of the sides of the progress of the general control of the sides of the sides of the property of the sides of the sides of the steady pro-poses of western civilization.

The future exerts an irrestitible impulse on the mind

prise of western civilization.

The future cereta as irredsible impulse on the mind man to try to estimate the possibilities of this New World which has already helped to transform the outlook for the entire giole. That the progress will continue no one will do people will be progress of all the nations of will be progress of all the nations of the

PROM HOOF OF BUILDING

New York, Jan. 18 (AP)— Po
Bloe said a woman, tentatively
identified as Juliet O'Leary, about
(2, plunged to her death Tuseday
night from the roof of a five-story building in midtown Manhattan. Police listed the deeth as an
apparent said-fed. They said they
found a note that she was leaving
\$44,000 in swimps and certificates.

Forecoster of Weather

The wester should be applying an increasingly mechanical part in the in this are. Allow Chelcies, who has second five in the in this are. Allow Chelcies, who has second five for the in the contract part in the in the contract part in the past of the contract part in the contract part in the five for the contract part in the contract part in the first part in the contract part in the first part in the contract part

The weather forecaster must depend upon himself apply. It is ead of the new weather man of New York cash ha has been shown by experiments carried out by sitteen laymen that he is accurate 87 percent of the time. It has on the basis of the meteorological facts he is able to gather been able to define what the weather will be. "The weather must is holding an important position for expecially air travel depends upon what he is able to forecast.

Tom Longboat

Time moved backwarf for a good many persons a brief space the other day on the news that Tom Longboat, long distance runner who had brought encome to Canada, had died on the reservation near incursive tensors to Canada, had died on the reservation near incursive tensors for classical had died on the reservation near incursive tensors of the glory as runner. For Tom Longboat came is an sign differing from the present era and fire a brief spall of time he became the chief luminary of the sport world. Through him came a reputation in long distance running for Canada.

Through him came a reputation in song canadae running for Canada.

Line of the came of the continue of the continue was a last and a household word. Many yet remember the lime when the news came that the Indian lad and beaten Dorando in Madison Square Garden in New York City before a wast crowd. He had goes there with a name which he had won the previous year in the Euston Marathon. He had goes to be continued to the continue of the world.

That world of his day was a different world from this. I had few if any of the problems that trouble people minds in these days. At the time of the height of his glory, the South Ariena War had been over for a number of years and the remaining the continue of the continue

believille.

The had drawn attention of the great world to Canada and to his ruce. One of the great proofs of his stamins was he race against a horse, deroting the animal. Some years later when was broke out longboat put his running shiftly at the service of the nation and served in the force as a runner. That such a result is not served in the force as a runner.

He has left a name that will hold its place in Car

The Same Day

Sidney Twp. Council

The inaugural meeting of ney township council was at 11 a.m., Jan. 10th., and following members subscrib-their designations:

WHY HAS AO BUILT A NEW PLANT?

At first glance the natural answer would seem to be to keep pace with the demands on American Op.ical Company Canada Limited for Belleville-made lenses. But, there were further and more compelling reasons ... reasons that become increasingly important with every day spent in our old plant-

And these reasona? Simply, to take full advantage of the countiess advances of optical science and research ... to incorporate the latest in modern lens menufacturing processor, to harmest the handed-and-one rever loss the paging years have produced. Because, it is only by taking full advantage of these assessed of Canada's streader of living — one of the highest in the world — for our employees, and also the fulfillment of our duty for the people of Canada by providing them with the best in ophthalmic lenses.

It was these reaces that impelled us to borrow from the Royal Bank of Canada the large sum needed to construct a new plant. For, as you know, it is wirtually impossible for modernic as not plant ... as undertaking fondcomed, to fallow it was not plant as undertaking fondcomed, to fallow it you desire to incorporate modern machinery and methods of manufacture. A plant to be completely efficient must be dealined around the production needs of the specific product, ... in our case, specific optional.

To quote W. R. Lett, our Company President, "the entire AD organization is looking with pride to the opening of our new plant; the most scientifically modem less plant in Canada, with the sure and cartain knowledge that our employees will continue the high, quality of our products to serve the cause of batter vision."

These words of Mr. Latt spell out the ressons for our new plant a plant that can meet and beat the competition we face ... a plant that, to us, stands behind and emphasizes our fath in Belleville ... our determination to be a good citizen and a good neighbor.

CONSTANTLY ENDEAVORING TO BE A GOOD CITIZEN - A GOOD NEIGHBOR.

It's Really SOMETHING!

Courage

Thirty-one-year-old Bob Punnett who had lived ten years in an iron lung except for a brief interval every day and asw life through a followignar window, died in Vancouver the other day. His relations with the outside world had been maintained with the lost radio and by the visits of friends. He had lived long enough to know the pleasures of life and freedom from being crippeds, as any boy and youth. Then came the blow so of life as others know the and had been done to be the control of the same o

was known because of nas chercimens, an americous grand of course his preat course;

He may be looked upon as typical of many who have in more degree to force; the joys of an active life. Yet he and others like him have developed a spirit of course gree sees through the clouds — something that is the woulder of those who are not handlesped. It night's seem to have the seem of the had less reason to be grateful and grounds for complaint; more than fortunate poople who may even be inset contented in the world.

least contented in the world.

Life strikes unevenly at humanity but fortunate are
those who can take these blows with a smile or a grin and
have the will to endure as did Bob Punnett. He had a compensation which he found in life which some fortun

stipsh hospital. This gives some idea of the progress of the Canadian That gives some idea of the progress of the Canadian Red Cross Society in providing medical sid and nursing sentiances as well as in forming community of the contract o

Commandments for Drivers

Taxi drivers in New York City have had a new code That drivers in New York City have had a new code of commandment which have been repeared for them and for the safety of the public. Private drivers find them in-portant too. These must be strangely familiar to people storwhere who have had worthwhile advise given them on entiless occasions. This code of driving morals is applic-able not only to taximen but also to the average drivers. Rere they are: Here they are: Be considerate of pedestrians

Never drive recklessly.

Don't turn corners fast.

Approach street intersections cautiously.

**Transfers in perfect condition. Keep brakes in perfect condition. Use tire chains. Adjust any mechanical trouble at once.

Always be careful.

Always be careful.

Always be polife and courteous.

That about sums up what the driver should try to try out in his everyday driving. It is like the laws of the dess and Persians, which could not be changed because they were the best that could be adopted.

About one child in nine in Canada bears physicat en-dence and speciological unhappiness as a result of rickets and thirty Canadian children children described in the con-ditions of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the control of the control of the con-trol of the control of the is the only one that cannot be explored an acquire qualities from food and therefore must be supplementary to the regular diet. Yet half of Canada's children at least receive no vitamin D as such. This vitamin is derived from fish livers and can be obtained in a number of forms:

Guard Health—Know How Notices and the server of the County How National Health Week it to be observed in Ganada in two weeks time. Freparations have been made to make the Week more than ever impressive in the lives of the people. Citisens' committees are being organised in many parts to easiet in the campaign which stresses the necessity of national health as a prime necessity of today. This is that the concentration of the poile mind on a great national objective, the promotion of health and the postponent of unitarity death. As had been stated "the first wealth is health."

The Health Lesson of Canada.

weath is health."

The Health League of Canada has the co-operation of
the Departments of Health and Education across Canada.
A great many organizations are engaged to take part in
this great co-operative effort of spreading the knowledge ing health.

unit great co-operative effort of apreading the knowledge concerning health.

The course of the Week the people will be given vital statistics, and other data on major diseases and on the efforts made to combat them so as to build up the health of the individual control of the

to them.

National Health Week is but a means of giving emphasis to facts which should be foremost in the minds of veryone during every week in the year. It is the hope of the Health League of Canada, which annually sposons the observance in co-operation with official departments of health and of education, that every week will be considered a "Richith Week" any 50th will not be forgotten during the week of which will not be forgotten during the week of which will not be forgotten during the week of the year.

Conservation

It is to be hoped that the likelihood of there being sufficient flow of water which will flow just the Hydro Effective Power Commission's turbines to guarantee that there will be no need of power interruptions later on. That there will be no need of power interruptions later on. That hope is cheritoded by everyone naturally and there is one way in which everyone can assist in making that desirable object attainable. That is to reduce as much as possible the ensumption of power by always practising conserva-tion of electric energy. It he public keeps before it this ideal, there will naturally be a much greater chance of the hope being realized than if users are carries by leaving lights burning when not necessary and in other ways using up power and the necessary and in other ways using up over and the necessary and the contraction of the proper and the necessary and the contraction of the proper and the property of That has been quite favorable during the first part of the winter. It helped to remove the blackouts.

part of the winter. It may be a superstant of the bear a real help that has as everyone knows new developments and new plans for power. These plans will bring results in the course of time. Projects under way will bring results in the course of time. Projects under way will be a superstant of the course of time. in the long run add a great deal of energy. But yet the demands of the growing province have to be considered and demands of the growing province have to be considered and so all in all a policy of careful conserving is the best guarantee of avoiding cut-offs.

The very fact that no one desires to have the return of the dark periods which were experienced last autumn account of the dark periods which were experienced last autumn account of the best incentive towards saving carego are some path waits only a policy of the policy of

U.K. Television in Road Safety
Annew system of television is being used in British for
the purpose of preventing road accidents. It is believed to
be the first time television has been used anywhere in the
world for eviduating people about traffic dangers. It was
tried out recently in Cambridge with appuratus known as
closed circuit television which carried alignals direct from

a to screen. Traffic at the junction of two of Camhibition which formed part of the town's campaign for pro-moting safety on the roads.

Born to Discovery

Some men and women are born discoverers and the history of the sciences contains many of these great lead-ers without whom every branch of discovery and advance ld have lagged far behind what it is today. Columbus born to discover America for he had the genius for was som to discover america for he mad the genuts of exploration and the courage to carry out his ideas. Today a few centuries following his momentous discovery, the New World is playing a mighty part in the feeding of the nations and in the climb towards security and the finest

form of democracy.

In medicine the same need is felt for persons with an eye for discovery. In invention there is seen the high place in medicine the same need is felt for persons with an eyfor discovery. In invention there is seen the high piace given to those who can recognize withter a new invention or hint of invention is leading. In the mechanical world of the motorcar, in the discovery of radar and such like grant finds of recent war years, there is the person with the alert mind that can tell when it is nearing something that may be of wast importance.

A small-arms manufacturer in the United States has set up a trust fund of several million dollars to find out the causes and cures of cancer and epilepsy, both worthy ests of the scientific mind.

quests of the scientific mind.

A New York Times writer says that "what cancer research needs more than anything else is more curious and ingenious chemists, physicists, pathologists, cytologists and geneticists who know how to experiment." It is point and geneticists who know now to experiment. It is pointed out that the two billion dollars spent on producing the first two atomic bombs would have given mandiad little if the foremost physicists of the world had not been made shaled to make the most of the discovery that uranium could be split by neutrons.

could be split by neutrons.

So far "there is no plan of education in research, no attempt to select the young men and women who have the rare gift of discovery, who see relationships in phenomena to which others are blind. Too much empirical foundering passes for research. Yet while imagination is the essential of all research, it is not enough to have an idea. sential of all research, it is not enough to have an uses, which may or may not be right that some foods cause nor-mal cells to grow wild . . Pasteur once said that the pra-pared mind knows how to make the most of accidental dis-covery — a tenet difficult to prove but there is no doubt if enough gifted men and women are selected and prepared covery — a tenet difficult to prove but there is no double should gifted men and women are selected and prepared for cancer research and if they are pold adequately for devoting their lives to the study of growth. The research will be more rapid than it has been and mandated may date to have fresh hope in the age-old fight against death and pain."

They Mark Time

Most people are getting quite familiar with their 1949 calendars by this time what with two and a half weeks out of the fifty-two of the year already having become history.

And yet the calendar does not grow old in the that it can be disregarded and thrown away, not until the year is ended and even then there may be some notes job, ted down on it, some recipes or some other mementoes which are worth preserving, telephone numbers and such

Makers of calendars this year turned out a really choice selection for the people and mahy are remarkably handy with a small calendar of the past month and the manny with a single calculate of the parents and the succeeding month set alongside the present month for convenience sake. At the same time like the style of some postcards many calendars are works of art in design and color as a scene in nature. In fact some of the calen-

san color as a scene in nature. In fact some of the calendars are the only works of art on some walls unless it be photographs of the family and friends.

In an age which stresses beauty of decoration in more inhomes the new type of allendar fits in exceedingly well. It is often real art. Some firms must take real pride well. It is often real art. Some nrms must take real prior in their selection of a claendar scene or picture to give to their friends and customers. Of these this year there have been many fine examples of illustration and the art of printing which will grace the walls of offices and homes

until 1980 is rung in.

The schoolboy when July and August come around can think that two of the greatest makers of history gave that the three never was a good wa. can think that two druck graitest makers of history gales that "here never was a good war."

In think that two druck graitest makers of history gales that the property of the

Good actions crown themselves with lasting bays; who erves well needs not another's praise. — Heath.

GOODBYE

What your life insurance company is doing to safeguard your health

Your life insurance company wants to do everything possible to help keep you in the best of health for the rest of your life. So, in cooperation with all other life insurance companies, it contributes funds to public health and medical research projects. Some of these projects seek new methods of preventing heart allments and such deadly diseases as cancer, tuberculosis and polio. Others search for extention information to prosted better mutition, pressarial contributions, the contribution of the search of the contribution of the contributi

In addition some individual companies sponner special health projects for the heactif of their policyholders. All those efforts help to redoce the ultimate cost of life interance. And they play an important behind-the-sense part in helping you and your family to employ longer, behinde lived:

How Nickel Benefits Canada

Since more than ninety per cent of the Nickel produced in Canada is sold to the United States and other countries, it brings a constant flow of dollars back to Canada. In fact, Canada's Nickel industry is one of our chief sources of U.S. dollars so essential at the present time to maintain our foreign trade and make available products not produced in this country.

These dollars help pay the wages of the 14,000 Nickel employers, and help provide the dollars which make it possible to pay millions in freight to Causdian rallways, to bey unburs, reach, coad, machinery and applies amounting to many millions each year. These millions, fewing into all industries through the length and breadth of Causda, help crease jobs for Causdians.

This World of Noise

A writer in the Hamilton Specialor speaks of the "wondrous power of nodes" and notes that music has invised bank; keeps time with factory mechines and that "the exaual customer of a restaurant is joiled with just occupiodous that aimout knock a hamburger of the hands." However he such that the sum of the property of the sum of t around the somestic hearth. He remarks that "some people turn the nucle on in the norming and keep it going until they go to bed—just for the sake of the noise. . There is developing space not merely an ambidestrous takent for reading, listening to broadcasts of shrill murder mysteries and knitting at the same time; it is a most unremainle per-son who cannot complete a jor remarked per-son who cannot complete a jor remarked to the same time, while accepting with a mile a undedn blast of an automo-bile horn calling for a beloved whose door is a good twenty feet from the curb."

This prompts the Hamilton editor to forecast that "in process of evolution, we should develop ear drums with the sensitive delicacy of an alligator's hide. What will happen n we hate to think."

THE QUALITY STOVE

When the manufacture of a stove is cont plated it has been, and still is, the policy of Findlay engineers to first build a product that will give long life and complete satisfaction. The "frills" are left as added features. The main aim of Findley engineers is

> to first, last, and all the time, see to it that a rugged product is built and that satisfaction

will be assured.

Let Us Point Out The Sterling Qualities of FINDLAY Products We are particularly pleased to represent this famous line of heating equipment and will be

glad to give our endorsation of this product.

HEART ATTACK

BY SHEILAH CRAHAM

"I am longing to show you my flat Ann." he said, easersty. "I employed Gargantiv of Bond street to decovete and turnish it for me. They made me pay through the nose, but the result is marvelous. It may be too small for my to live in attar we're married, but we can kneep it on an a pled-a-

sorro."
They were now in the outsidrts of London and Ann gused about her avidly, Same old shums, same little ranged children playing in the gutter. She was disappointed. She had forpoiten the power of the control and the power of the control and the property of the property and punger did not where nowerly and hunger did not

It was Saturday and the streets were crowded with bashet - laden women, most of them carrying a baby in their arms. It was a shame they couldn't afford to hire some one to look after their ladinal while they we will be the some to look after their ladinal while they was well as the some their ladinal would spend some of his money truth to alleviate the missioner when the some way well as the same way when the same way well as the same way when the same way well as the same way when the same way well as the same way when the same way was the same way when the same way was the same way when the same way was the same wa

ery of the poor.

"Up Vaurhall Bridge Road, past Victoria Station, the smooth car glided. A few minutes later they were in St. James Park and driving by Buckingham Palace. From the mast on top a Union Jack

hing limpty.

Five minutes later they were outside the apartment house in Curzon street where Peter had

"Have Miss Temple's luggary ent up," Peter commanded the doorman. And to Ann, "We will keep it here until we know where you are going." Ann waited passively while Peter opened the door of his martment.

"She're the future hirs. Roland,"

"She're the future hirs. Roland, "he laughed, and pulled her over the entrance. The wife hall was richly carpleted and state of the horough on after room and deplies and the breasters he wideter admiration. A few momental later. Ann's loggage was deposited in the hallway and the setter don' was closed.

outer door was closed.
"You haven't seen my bedroom
yet, Ann. It's a lovely room.
Wouldn't you like to see it?"
"Let's look at that later." Ann
begged. "Phew, I feel so weary."
She pulled off her small black
hat and pressed her hands to her
termiles.

"Tm sorry, darling." Peter po his arms around her shoulden "I was forgetting you must b tired. Here, let me take off you coat. Now sit down. That's bette int't il?"

She smiled systefully at him an

Peter lit a cigarette and walled a few paces away from her. Then he turned and faced her again. "I'm going out now to get the marriage license. Which day shall the deallers."

Peter repeated his question as Ann remained silent. "For which day shall it be, darling" I can get a special license, and then we need wait only a couple of days." Ann jumped to her feet and paced restlessly up and down the thick carpet.

thick carpet.

"Let's wait a month or so Peter," she begged. "I'm so confuse just now. I'd like to get my best ings before we decide on it day."

A sowl shadowed Peter's not.
"I don't know what to make of
you, Ann. You act as though you
don't love me. What has happened to you? I thought you would
be happy to be with me again.
Is anythong wrong!"
Any cavit vin the armchair and

Ann sank into the armchair and said slowly, "I don't know. May-the there is. It's probably because I am tired, but now that we've met again I feel kind of let down. You seem different afrom the old Peter I know. It's all probably my fault. I've chang-the the the the work was the letter that the the two wars we have

been separated.

"Plot I'm or that's the whole reason. I than perhaps I have been bories the memory of have been bories the memory of have been bories the memory of the persent been thanks to be radion." See that we have a subject to the persent been hands to be radionable and continued, "That's why I want to wait a month before we marry. I want time to get to know you sgain. We've waited to long, Peter, nurely we can wait another month."

"What do we want to walt for?
"What do we want to walt for?
"Sus pill love me, don't you?"
"I suppose so," An replied.
"I suppose so," Peter repeated, furiously. "I suppose so. Why, ite tell you right now, there are dozens of girls who would fee honored if I wanted to rush them the you wanters. You suppose so."

into marriage. You suppose so!"
"You may not want to marry
me when you hear what I have to
tell you," Ann said quietly.
"I don't understand what you
are talking about." Peter kicked

way a cushion that lay on the floor. "If you have snything o your mind, for heaven's sake to me and let's get it over." Ann chared her throat, ner

ously and began.
"Remember in the ber I told you Tous Roberts had died?"
Peter podded.

died," Ann mild slowly. "We were going to Chicago together and he had a heart attack in my Pullman drawing room."
"Oh, so that's it, is it?" One conner of Peter's mouth twisted into an ugly meer.

"Little Miss Innocent, in other words," Peter interrupted. Ann jumped angrily to her feet. "Unless you are going to stop

your insinuations I will not continue!" Her eyes blantd at him. Peter regarded her shrawdly for a moment before continuing. "You must admit it is a difficult story for me to swallow Am.— but go on, I'd like to hear th

There isn't much more to tell.

I was arrested at the station."

Ann's lips trembled as she remembered the agony she had suffered.

"Of course it was soon proved."

he had died from natural causes the continued shakily. Dut not not until every paper in the country in had the story of the circumstance as surrounding his death. You see, he was very rich and a mar-

While she spoke, Ann kept her if yes away from Peter, but now she turned them towards him supplicatingly. "You believe me, Peter?"

There was an enigmatic smile

hands and neid ner at a supdistance from him.

"You say there was nothing be tween you and Roberts, so I be lieve you. From now on let's for get it."

e He allenced her. "That's all right, Tm in love with you, see? When a man's in love he believes in hig girl. Say no more." His gaze travelled beyond her. For a few seconds his thoughts were apparently occupied by a small table. When he spoke again his r voice was changed. "Why not stay here, Ann't There

Ann started as though he has struck her. Her eyes widenes with suger, and "e had difficult restraining the litter words the

rose to her lips.

"After all, Ann." Peter continued, "I'm being pretty trustworthy
to believe that story about Rober why not be as trusting your-

going to marry him, wann't she! But Bill had never questioned her about Tom. He had taken her innocence for granted.

"Ann, stay here," Peter urged. He tried to draw her into his arms. "I have waited for you so

But Ann had made up he mind. "No. Peter."

Peter shrugged his shoulders and right, let's not say any moment. I was thinking of you, Au. I thought you would be lonely

"But I won't be," Ann told his quickly.

"As you wish, Ann. I will gyou a mite at the Bradley, an have your higgage sent there."

He left the room, and Ann set tied back into the deep upholiste of the settes. She felt tired, an abe closed her eye. A tiry and

mouth as she slept. The soft for fall of the man servant awaken her.

the saked him.

"About half an hour, Miss," he replied. "Mr. Roland went out. He hold me to tell you you were to rest here until he came back. He had to see a man at his club. May I get you something to drink, Miss? A cocktail or a whisky and soda?"

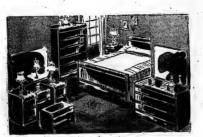

"No, thanks, but I'd like some e... I haven't had a good cup pr two years." When the bulles ad left, she rose and walked bout the room. She was glad Pet I had gone out. She needed sollmae to collect her scatters houghts. When the buller reap poared with the tea tray. Am saked him where the pearest poor

Pattern of the Weather

Pattern of the Weather Dame Nation and the Weathers and the Weathers are not made attention than usual this winters made and more attention than usual this winters man and so, the, weather, which surrounds man, herere he goes and whatered he is doing, occupies a rominent place in the news which he reads. That is not matural for estributions and disastrons froot are of the greature of things, calematies. They are all linked yet with follow hatter who predicts over the weather and we such calamities as these upbelevals.

Modern collection of weather information is evorsine.

in with Mother histure who presides over the weather and over such calamiles at these inphereals.

Mother collection of weather information is growing more complete and has helped to extend the interest which the weather holds for every human being for it is becoming unusually exact and the public is learning to trust the weather hursen forcests though they grow the seather hursen forcests though they continued the seather hursen forcests though they continued the seather hursen forcests the seather hursen for the seather hursen for the seather hursen for an number of hig stories of storan during the past few weeks, last week bringing in news of the instructors storens which struck the Pacific oxidate.

One thing the weather forcest and the weather struction as it exists in the same stories are done in the stories are doing its to link up local weather with the weather struction as it exists in the same stories are doing to the first of the first hursen of the Bey of Quite experience are associated with the situation in this part of the globe. Today mention of a scann near the Facilic may have importance to us in a few brief hours. At least it may change the temperature considerably. We are learning to how worse why conditions resist and where the warm and the cold waves of air come now and with per come.

The Drama Goes to the People

The Drama Goes to the People The growth of this drama owns a tremendous debt to steeling players of England of another age who deteil its and instructed the people of their time through these to of that day. Now in this very modern world some a revisual of the perambaltaning theater of old. The sends day lack of stages areas which have brought about the perambaltaning theater which is to be nording to Kgon Laznen, writing for the United Kingdom Dewis of the Contract of the

is higher and technical personnel.
This modern theatre is now being built in a factory Leionstenhire. It offers the prospect of a romantication that the prospect of a romantication of art and culture to a portion of the country's person which had been neglected, he says, that is, those who will be a factor of the prospect of the pro

stree and movies.
This travelling theatre on wheels is called the New plury. The theatre sims first of all at performances of a striket value with first class experienced casts. The periory is to consist of classical, modern and experintal pieces to meet every taste— of even more important periors of the start it will give school children a chance to see mostle threather complex british.

so is this that it will give school children a chance to see matic literature coming to life. The undertaking has the moral and financial support tage celebrities and educational, historic and social or-

missions of kngland.

Everywhere in this country and in every country are und dramatic groups performing in which are juveniles their elders, this effort indicating the perennial interest that roll of catertainment with its depiction of human

is the form of entertainment with its depiction of human is and its problem.

Lovers of drams, the living presentation of humanity, it which the success of the Erithal undertaking and novement to bring the transcending art of the drams downwent to bring the transcending art of the drams downwent to bring the transcending art of the drams and life. Engiand which produced the greatest one-still be an example to the people of this country. What the worlding players of three and a last certainty sage in that up did, this may now do in it own way carried to the produce of the drams and the same of the drams and the same that the

WHY THE BIG WINDOWS?

That's a perfectly normal question and one that many people have asked after seeing our new lens plant here in Belleville. The answer, on the surface is simple: "Because the many big windows let in more light."

But that's only half the story. We provided the best in natural lighting because we want working conditions in our new plant to be the finest in Canada. Thus, our employees will benefit in health by pleasant, well-lighted surroundings.

There is a direct relationship between light, sight and safety. Ample light for the job - and over 70% of the wall area of our new plant is in glass - is one of the essentials of a safe, healthful and comfortable place to work. Shadows make heavy demands on the Individual worker's energy when the eye must adapt itself to frequent changes from light to dark areas and vice verse. We've taken complete adventage of natural illumination, utilizing every available square inch of wall space, plus installing overhead windows that provide natural light in the best possible manner.

Big windows aren't the only advantages offered by this new plant. To make it the most up-to-date lens factory in Canada we have installed new machinery and equipment, modern washroom facilities, a personnel recreation room and have completely designed the plant with one objective in mind - production of the finest in ophthalmic lenses.

However, we want more than our employees to be proud of this new plant. We also want our neighbors and fellow cltizens in Belleville to be equally proud - that's why we want to tell you about our tremendous expanse of windows and other features of this scientifically-designed factory. By providing the best in lighting by taking full advantage of daylight every employee profits. Everyone, that is, except the men who will clean the windows and even they, we feel sure, will applaud our decision to use daylight to the full-

NOTE OUR NEW AD

www. 1948 425,000,000 шши \$11,415,000 Revenue producing assets

With completion of a four-year programme of modernhasion as expansion, Candida Breverier Limited is now the largest breviag company in Canada First assets, in Canada sloop, have grown streatly— from \$45,000,000 in 1941 to more than \$33,000,000 in 1941 to more than \$33,000,000 in 1942 per relative to the present than the provision for depreciation, is quite present than the present that the present

This progress is a reflection of forward-looking, aggressive policies. The Company's firstly consolidated properties, with the modern equipment and buildings, are present revenue-producers offering ample security for both inserest and sinking fund paym on the Company's debentures.

Speaks for Free Men and Democracy

The demonstrate world heard a voice speaking boldly and bravely on Thursday in a world of unrest. It was the worke of the President of the United States who demounced Communium and its false philosophy, gave his piedge to a worldwight crustage for "peace, plenty and freedom," and offered the resources of his country to maintain a world of

worksyde crusace ror "peace, penny and recogn," and offered the recourse of his country to maintain a world of free nations.

Upon President Truman has fallen a giganiste task to direct the United States in a time which calls for the united site work of the state of the country of the United States in a time which calls for the united site world littlened to his voice as he held high the local of freedom and announced that the "initiative is our." At the same time he affirmed strengthening of security of the North Atlantic area and offered to the world's under-developed areas a program of scientific astvances and industrial progress.

The President held before the democracies the fact of the growing strength of the western Alliance and the development. The area of the strength of the str

1949 Tourist Prospect

Amouncement that over 81 per cent of the tourists who entered Canada by automobile last year entered turough Onlario or 1,123,665 out of the Dominion total (1,23,965 persons, was encouraging to this Protoco as, proof of the appreciation by risitors or the security qualities and the other appeals of this part of the becoming united and the other appeals of this part of the looking to see more and most the state of the state of the country and the state of the country and the state of the country and protocolours that the Protoco will step up the promotion and publicity campaign of appeal to prospective visitors to Canada.

extion of special despet Cultural Forces of Europe

Cultural Forces of Europe

"Beconstruction and rehabilitation of the cultural forces of Europe are just as important as the continent's physical rehabilitation," said Henry G. Birts, Fresident of the Canadian Chamber of Commerce as he garden continent of the Canadian Chamber of the Canadian Chamber of the Canadian Chamber of the Canadian Library Association and the Canadian which has twice come upon Europe in the loss of ilbraries and books, which have ever had a profound influence upon the progress of at the Second Gress War should give people opportunity to think of what must be the result of this destruction. The purpose of the "Sacraf of Books" is to collect books and other publications of educational while for distriction. The purpose of the "March of Books" is to collect books and other publications of educational while for distriction. The purpose of the "March of Books" is to collect books and other publications of educational bushes for distriction. The purpose of the "March of Books" is do collect books and other publications of educational bushes for distriction. The purpose of the "March of Books" damaged during the war. Lists of such books will be distributed of the distributed for the such publication of the such publication of the such publication of the such publication of the such publication are received. A direct appeal is being made to Canadian libraries and professional organizations and local March of Books will be established in most Canadian centres.

Canadian administration publication organization and urred busi-

shithed in most Canadian centres.

Mr. Bitch has pledged support of the campaign by Canada's national business organization and urged businesses organization of Surope, be said, and stressed the fact that chees is a deependen need for books in the universities and other centres of learning which have been blighted by war. Here is a direct way in which to help Europe get back on En feel. On behalf of the 500 member books do I'rosie to Chambions of Commerce, X most Partity commerced this

January Lesson for Man

January Lesson for Man

y A writer in the New York Times see in January evitence of the high calling there is for man and the hope
hat is for him whead. It is a

the see of the see of the see of the see
had been a see of the see of the see
had been a see of the see of the see of the
see control feed store calendar hanging between the two
thin windows, with its pleture of a summer meadow and
was pasturing among the disty-starred grasses. He
hases the curtains. He looks across the white hills and
Gir the old cherry table with its red geratiums towards
is light. Chacketes, woodpechers and likelight swood
views to the window all meadows and the see of the
index of the see of the see of the see of the
index of the see of the see of the see
is accord with a master plan. Whe men realised long ago
tifut man needs faith more than he needs knowledge and
calculation are wear has become a part of tradition. Gone
is the past with its shortcomings; shead is a new state on
which man can write with hope and courage. For January is the month above all others than can teach to it issons
or wently.

of verity.

"We marshal our facts and connect rows of test tubes;
we build minautorian machines and sift the dross from primal elements. And when the fewered storing is done and near formulas are evolved, the greatest of all elements is just what it was before — that faith that man will eventu-ally learn to live in peace with his peers. The beauty on alceping rivers and the budded trees slihouetted at sunset tell us there is always another chance."

Crossing Streets

Toronto is going to entores crossing of streets in the downtown area comers and those who infringe the regulations by walking across a street in the middle of a block block which was the control of as abould realize that the molorist naturally expects people fo cross at the corners or intersections, not in the middle of a block and those who ignore the rules may very well invite an acceptance of the control of the rules of the control of th

alker and the car driver.

Are you complying with all the regulations governing business operations today?

Are you receiving all the advantages of the deductions allowable on your income tax returns? WORKMEN'S COMPENSATION If covered by the Act, your 1948 payroll returns and 1949 estimates must be filed this month.

INCOME TAX If you have paid dividends and shareholders' bonuses, you must file T5 returns for February 28th., 1949. If you have paid wages or salaries, you must file T-4 re-turns covering such wages and salaries and all taxes de-ducted at source by February 28th, 1949. Your employees must file with you return T.D. 1, and you must deduct the necessary taxes at the source and remit the same together with return-T.D. 2 to the income tax office no later than the 7th day of the following mouth.

Corporation returns must be filed within 6 months after the close of your fiscal year. Personal returns must be filed not later than April 30th,

ployers must also abide by the rules and regulations of Unemployment Insurance Commission and by the ario Act governing Hours of Work and Vacations with

Short and Long Addresses

The shortest peoch ever meds at an inaugural at Washington was that delivered by George Washington. Washington was that delivered by George Washington, 134 words in all, any part to New Troit Cor. Predeticed, William Henry Harrison who at the age of 68 spoke 8,773 words. Calvin Coolidge, considered a leanous speaker, delivered the third longest of inaugural addresses, 5,633 words. One president, Franklin Pearce, spoke 3,10 words in 1853 from memory.

1852 from memory.

words.

It is said that those generally considered the greater presidents preferred short speeches, among them Washington with J.500 words. Maddon spoke only 1,170 and 1,167 words and Jackson used only 1,116 and 1,167 in his two imangurations. Lincoln, in the midst of the Criti War, used only 588 in his fampus speech of "malice variety for all."

none" and "charity for ski".

In modern days Wilson used 1,617 and 1,647 in the.

First War era, Roosevelt spoke 1,770 words "to rouse the
country from the depths of depression." In his second he
spoke to a kength of 1,810 words. In the shadow-of the
Second Wordt War he spoke 1,328 and four years ago only

641 words, the second shortest address.

Burns' Anniversary

One hundred and ninety years ago on January 25, 1759, Rober rms was born in Ayr, Scotland, and his name and 1 endure and will endure. He is the national 1769, Rober ras was born in Ays, Scotland, and not amans and rendure and will endure. He is the national mans and rendure and will endure, He is the national has greated for a contract and the greatest of song witters of all ages. His works are among the most human of all the gifts by men to posterity for Burns himself was intensely human. In the world of antisty of today, Burns makes an speels which goes to all hearts, the appeal of humanity and human brotherhood. It all the total prest he and file works were not for his based of the same of the same

will list cut the ages of time.

Bottland tid much for Birms. It had developed a propie who leave their mark wherever they live and wherever they while his heart was meditating on songs.

Burms was the finest expression of his people in song. He summer that the markets of the English longua. He wrote early in lite and was immediately recognized as a genuts. Many of his great a, go serve written in the early twenties. He adapted many popolars coags of his country, enriching them with the fire of his greins. He was a streless master in composing songs on the human the construction of the country, enriching them with the fire of his greins. He was a streless master in composing songs on the human the construction of the country of the country, enriching them with the fire of his greins. He was a streless master in composing songs on the human the construction of the country, enriching them with the fire of his greins. He was a streless master in composing the streless master in the streless

is matchines for it is the voice of his personality, one of the bitter of the process of the same probability of the process of life, as much size of the process of life, as the process of life, as much size of the process of life, as the process of life, and the process of life, as the process of life, and life, and life, as the process of life, as the process of life, as the process of life, and life, as the process of life, and life, and life, and life, and life, as the process of life, and life, and

Finest Quality Tea

Tested and Proved ... on the World's Toughest Proving Ground

Yes, they really gave it the business ... this latest and greatest in the line of great Chavrolet motor cars.

You would think they were trying to tear each car apart if you could see the fest drivers come tearing over roads that would rate a "Detour" sign on any public

thoroughfare in the country. Over and over again, day after day, the tests continued . . . until there was no shadow of a doubt that a new sensation in riding

comfort would be waiting for the public on Announcement Day.

So when your dealer says, "IT'S HERE!"...

you'll know he's talking about an experience, not an experiment. He's asking you to step into the most thoroughly proved and approved car that's ever been presented to Canada—in CHEVROLLT

pace in Chevrolet leadership.

It will open your eyes to greater value . . . the great '49 Chevrolet that's coming soon!

The enterprise of the Navy accepted the greatness of

The engineers of the Navy accepted the greatness of the challenge and carried out the operation with success as expected.

Popularity of Names

Popularity of names may change with the years but ne retain their popularity which rather grows with the sage of time. This Week Magazine recently after a passage of time. This Week Magazine recently after a survey of names in the United States was able to report the front running names were still Mary (8,000,000) and John (8,000,000) with James, Charles, George and William, all humiter names for contunts, account for another 15,000. In dates there in a very complex of the Mary of the Ool. In dates there in a very complex property of the Mary of the Complex of the Mary of the Mary of the John and David and the gift are Starburs, Linda, Patiticia, Mary, Stuan, Joan, Carol, Diane, Judith and Margaret. Southern States go in heavily for double names like Mary Lou and Bessie Sue and below the Manon-Dittle line there sheek, Ira, Arryl, Joved, Lyng, Adelia, Schnette, Ver-non, Brigham, Floyd, Ruby, Goren and Daciesen.

Neighborly Spirit

Neighborty Spaint

The other day a young Ottawa couple living in the West End lost their home and practically all possessions by fire. The formula is graded for a present of the property of er, the very people this man had thought of as hard and c-centred because they had feared to intrude in his less

obvious troubles.

We are mainly concerned with our own affairs, but such incidents as these show that at heart we are neighbors and full of neighborly feelings. It is a cheering thing to know.— Ottawa Journal.

LIBBY, MCHRILL GIBBY OF CANADA, LIMITED & CHATHAM.

WHY IS OUR BUSINESS DIFFERENT?

When our new plant is in full operation, Belleville will be the home of the most modern, scientifically designed lens manufacturing fac-

From this plant will come the finest ophthalmic lenses that human skill and modern machinery can produce. Prescribed by the ophthalmic professions, these lenses will provide millions of Canadians with visual comfort and efficency.

Here at AO, our business differs from the usual industry because it is concerned with visual health. Our business must be operated for the benefit of the public. Like other industries, AO has to make a profit to remain in business and it must have satisfied employees beyond that, however, the Company's policies are determined by the needs of the public.

... To do our job to serve the public we must make the finest lenses possible. .In fact, this is more than our job - it is our duty. That's why we have built this new, scientifically designed factory, and we hope our neighboles and fellow citizens in Belleville will be proud of what we've done. For twenty-five years now, we've been a part of this community, and we're happy to participate in its growth.

When people think of better vision, we want them to think of Belleville - the home of skilled people working in the most up-to-date, scientifically designed lens factory in Canada.

This is why our business is differentwe're striving to give our employees the most modern producton machinery in a completely new plant to make even better lenses, and to meet the public needs.

ROGRESS

AGAIN MARKS THE RECORD OF THE IMPERIAL LIFE IN 1948

ASSURANCES: Another milestone in Imperial Life history was passed in June of last year when the amount of assurances in force in the Company passed Half-a-Billion Dollars. The total at the end of the year amounted to \$526,914,000. New assurances in the year totalled \$72,304,000, exceeding the previous record established in 1947.

INCOME: A life assurance company's revenue comes from two main sources—premiums from policyholders and interest from investments. During 1948 The Imperial Life received \$16,267,000 from policyholders. Interest earnings amounted to \$4,951,000.

ASSETS: The assets of the Company, held to meet future obliga-tions to policyholders and heneficiaries, now amount to \$152,861,000. The investment of these funds helps to build the country and faster continued employment.

BENEFITS: Benefit payments in the year amounted to \$8,586,000. This figure is among the most significant in the Annual Report of a life assurance company for it represents choques for widows, peasings for retired people, income for children's education. Since 1897, when The Imperial Life was founded, \$181,000,000 have been distributed by the Company in this manner,

These are highlights of The Imperial Life's 52nd Annual Report. A copy of the complete report will be

IS YOUR PLANNING TIME

This is the season of the year to arrange for doing those things you have been thinking about. It's time to plan crep rotation, to order seed and fertilizer, to nudget for more stock and new machinery, and plan changes to your barn and buildings. Your Dominion Bank Manager can show you how these changes can be made through helpful Farm Improvement Loans. Next time you are in town, drop in and discuss your plans with him. It will pay you to investigate.

Prime Minister to Visit U. S.

Prime Minister to Vinit U. S.

Prime Minister Louis St. Laurrent will stil President
froman at Washington in Pebruary in suppose to the nistation from the head of the United States Government.
Amouncement of the coming visit was made on Thursday
in Washington and Ottawa: Such a visit of the head of
one government to another is a symbol of the fine spirit of
strendship and good will of these 'wo neighbor nationa.
Pormer Frime Minister King on occasion visited the United
States and now as the head of the Camadian Government
it is natural; for Mr. St. Laurent to make this visit as the
great of the President with whom he will have no doubt
more than the company of the company of the company
of the Camadian of the Camadian Company
in the Depole of these two cognification the reference
to the friendship of good neighbors and of people who
have very close rucks it isse with one another. Canadians
visit he United States and enjoy the infinite appeal of the
attractions of that great land and Americans are Canada's
most prominent visitors. So harmony and friendship of
Canadians and Americans as individuals and as peoples
and states are developed.

Danidians and Americans as individuals and as peoples and states are developed.

Freyone will recall the cocasion not so long ago when Canada's Governor-General, Ills Excellency Viacount Alexander, and Mrt King were guests of the United States on the occasion of the americany of the College of William and Mary at Williamsburg, Virginia. On that occasion the Canadian guests and the President were Paucoud by the

Canadian guests and the President were henced by the College. Such functions are happy occasions which cannot but seem much for the enduring friendship of these two good neighbors and for the happy associations of the leaders of \$be nations.

British Export Trade Record

British export trade in 1948 broke all records, December returns published by the Board of Trade show overseas shipments for that month were on a working day basis of approximately 152 per cent of the average month in 1933 or 2 per cent over the end-per target. The average daily white of goods exported was up 3 per cent in the last month of the were.

ier is per cent over the end-year sarget. The average daily spales of goods exported was up 5 per cent in the last month in the year.

United Kingdom Information Office states that the flight rate of exports marks only the labest advance in the sheady upward curve maintained by the U. K. Import trade starting the year. Among December imports of note was the rise of cotton yarms and manufactures which for the flast time since 162 exceeded 250,000,000. Asports of man-ports, machinery, reached 250,000,000. A tool of 22,120 learn and changle was exported valued at 323,000,000.

Winter's Changing Phases

Winter's Changing Phases

Winter is swiftly passing, in about a week's time half

winter is swiftly passing, in about a week's time half

at this quarier of the year assigned to winter will be past.

And shark fire remaining part of the winter will be past,

and shark fire remaining the past of the winter will be past

both and the past of the assen has been following

an exceptionally mild autumn. But some say that this will

make the temperatures and the weather pay in the coming

meets and fit apring. But no prophet knows for certain, is

merely kript to find a chat through the misse of weather

conditions, which seem more than ordinarily ficile and

the merely kript to find a chat the will come in his blanch

and in Auff. 1. Dis weather that will come in his blanch

and in Auff. 1. Dis weather that will come in his blanch

and in April.

The variability of the weather, which is responsible to no one's command, except nature's, has its appeal and its costs man. Everyone likes some sort of change and the weather gives it. No one would want to know exactly what the weather would be like long periods of time ahead for that would mean loss of the attraction of not knowing swrighing that is coming especially the delights there are in surprisingly fine weather. No one would want to know in a severa winder long days aloned how much they would have to endure from the variations of temperature. Variety provides a "lack" and a hope's or the certainty imman to-man for he likes variety and he likes surprib because it leaves everyone expectant. Nature's changes add the spice of life.

JUST FOLKS

By EDGAR A. GUEST (Copyright, 1949, Edgar 4. Go

BIRTHDAY GREETING

A deeper love of all things good; A truer sense of brother-hood; A gentler tolerance which That all life teaches you may

learn.

May Time be like a mountain high.

Which climbing, broader to the eye he scene becomes, with splenones, with spien

some becomes, which does new lat, lower down, youth cannot view, and as these visits you ty you rejoice in growing

Time shell change the brown to gray, plumpness from the cheeks away, svery pessing year

May this day many times

And find this everlasting truth Denied to resh, ambitious youth:

Denied to ram, worth youth youth That notwithstanding all his Faults, Something the soul of man exalts. Then, as these peaceful charms unfold May you delight in growing old.

CHRISTIAN SCIENCE SOCIETY

WELCOME TO

SERVICE CONDUCTED 2.00 P.M.

51°

Their Influence is Great

Their Indicence is Great Notice the year should have better how important a factor the churches are in the national, the community and private life as at this season when annual meeting are being held and summaries of the progress of these various religious bodies are presented to the public through the daily and weekly press. Such attentions as these annual meetings command in itself a proof that the churches are exercising a profolium financess on the thought and effort of individual and community. Our orderly society over much to the loyal manner of the proof the contract of the proof t

parameters, our ordersy society owes much to the loyal members of the churches.

There are some who do realise how profound an influence are some who do realise how profound to the day and the problems of their displays of the day and the problems of their displays of the day and the problems of their displays of the day and the church in its branches is the finest expression of ideas of conduct carried out into life and action, when men and women form such organizations for the benefit of society as a whole as well as for the astinction of their of society as a whole as well as for the astinction of their

members.

There are many persons in the churches and there are many who are not adherents or members. There are seen who always give their moral and financial support to the various bodies which occuply so prominent a place in civilization and leave the impress for good on their country and the lives of the people.

Church-goers have a satisfaction of knowing that they account the lives of the people.

Church-goers have a satisfaction of knowing that they account the lives of the people.

An one living in a land of churches can contemplate what a land without churches would be. Fortunately in our civilization the church and the state are able to rear as society which is moving progressively owned towards to the things to the things to the account t

evinisation the circum and the state are and to rear a society which is moving propressively coward towards the ideal. They are constantly moulding individuals and infinencing the public attitude. To know that the churches are full of seal and vitality is exceeding that should be a matter of great satisfaction. By their works they are known and their works pronounce

them good.

To read behind the figures of growth and of monies raised is to catch a glimpse of the greatness of the total effort of these communions in their reaction upon society

effort of these communious in time results upon another world.

Bitudy of these reports will bring something of the real-hatton of the full impact of the lifts and work of the churches on contemporary society and life. The effect on the nothing but tremendously important. Fortunately the church is a great part of our life today.

Showed His Admiration

One of the most munificent and yet one of the strang-est benefactions ever given to any seat of learning was an-nounced by Corder University in August of last year. The donor was raid to be a Frenchman and the amount involv-ed \$6,000,000. No further details were given and the uni-versity kept mum on all details of the gift and the donor,

versity kept mum on all details of the gift and the door, reportedly at his request, any Hamilion Speciator.

Now, however, the skory behind this enormous gift has been revealed. For many years, Toy-reavoid Antonin Besse, "seatiny French merchant, had admired the qualities of the Conford undergraduates whom he employed in his business undertaking. Desiring to give more young men and women the opportunity to enjoy the type of education which produced them and which he considered superior to any-ling gile in the world, M. Sees decided to donate \$5,000,—thing gile in the world, M. Sees decided to donate \$5,000,—thing gile in the world, M. Sees decided to donate \$5,000,—thing gile in the world, M. Sees decided to donate \$5,000,—thing gile in the world, M. Sees decided to donate \$5,000,—thing gile in the world, M. Sees decided to donate \$5,000,—thing gile in the world, M. Sees decided to donate \$5,000,—thing gile in the world, M. Sees decided to donate \$5,000,—thing gile in the world, M. Sees decided to donate \$5,000,—thing gile in the world and the second thing gile in the world and the second the second thing gile in the world and the second the second thing gile in the world and the second the

sung ease in the world, M. Besse decided to donate \$8,000, 000 to the great university.

"Gril" was the quality said to have been admired most by M. Besse in the young men who came to him from the gregoulages, towers, and spires of ancient Corico. To the gregoulages who are or have been sensioned by "A". grey colleges, towers, and spires of ancient Oxford. To the grigulated who are of have been employed by M. Besse it is grigulated who have not have been employed by M. Besse it is proved much effective authorsonics for their "alma mater" that also it to beneaft by such magnificant generoidy. Perhaps the Prench would use the word "heroie," for it is al-nost that. No doubt much critician will be levelled against the donor by his compatitots, who might feel that the gift could be used for all isset equal advantage in his native

Jubilation is evident in Oxford, and the university authorities are moving swittly to make good use of the great gift. \$1,000,000 is to be spent on the improvement of the existing colleges and the remainder of the money is to be used for extensions "which in due course shall acquire the full status of a college," to quote the college authorities the full status of a college," to quote the college authorities the full status of a college," to quote the college authorities the full status of a college," to quote the college authorities the full status of a college, "to quote the college authorities the full status of a college," to quote the college authorities the college authorities and the college authorities are colleges and the college authorities and the college authorities are colleges and the college authorities are colleges and the college authorities are colleges and the colleges are colleges are colleges and the colleges are colleges are colleges and colleges are colleges are colleges and colleges are colleges are colleges are colleges and colleges are colle

The superior man will watch over himself when he is alone. He examines his heart that there may be nothing wrong there and that he may have no cause of dissatisfaction with himself. - Confucius.

for electrical energy without precedent in the lattery of the Province. To meet present and future needs, The Hydro-Electric Power Commission of Ontario is now speeding to completion the greatest construction program, it has ever undertaken. Ten new plants will swell the power supply to industries, holines and farms by approachmately 1,135,000 killowarts (1,620,000 hg).

A frequency conversion program for a section of the Province is also under way so that ultimately 60 cycles will be the standard frequency throughout Ontario.

CHENAUX—Octaws River, East. Ont. 119,000 kilowatts (160,000 hors-power). First six units scheduled for service in 1951. Remaining two units in 1952.

TUNNEL G.S.—Mississagi River, N. Esst. Oct. 42,000 kilowarts (36,500 horsepower). Scheduled for service early in 1950.
